ADDITIONAL INFORMATION

Please Note:

If a pool barrier and/or signage is non compliant a re-inspection will be completed by Solutions in Engineering within 90 days of the order being placed with us. The inspection is reliant on the recipient of the defects report (form 26) informing Solutions in Engineering that any non-compliant pool issues have been addressed. Reinspections are charged at \$198 per inspection of a 'shared' pool.

This pricelist is for a typical pool enclosure of up to 100m2 within SEQ metropolitan areas. Larger swimming pools or pools outside this area will require a quote. Please contact our office to arrange this.

Due to the force-resistance testing requirements of the pool safety standard, pressure must be applied to fencing. If the fencing is damaged during this process Solutions in Engineering or its employees will not be responsible for any loss, damage or injury caused by the inspection. In addition, due to work health and safety regulations, if the inspector suspects that the fence contains asbestos, s/he will be unable to complete the inspection or issue a certificate without being satisfied that the material does not contain asbestos. If the material does contain asbestos, we will require proof that the fencing will withstand the required force.

Our inspector can advise which day they will be at the property and whether it will be am or pm. If a date and time specific appointment is requires, it will attract an extra fee of \$98.

REPORT DETAILS

Date current certificate expires: ____/____/____ No previous certificate completed

Signature: _____ Date: ____/____/____
