Contractor's Safe Working Agreement

This statement provides details on how I/we, the Trade Contractor will manage the health and safety hazards associated with my/our work.

ASSESSING WORKPLACE HEALTH AND SAFETY RISK

The contractor agrees not to undertake any task without first assessing all Work Health and Safety Risks associated with the task. A full JSA (Job Safety Analysis) must be completed by the contractor before commencing any task. All work must be conducted in accordance with the *Work Health and Safety Act 2011* and associated regulations and Australian Standards.

1. TIDINESS

- Ensuring work progresses in a tidy manner, work areas are kept clear of excessive rubbish and work areas are left in a clean and tidy condition.
- Ensure that rubbish is disposed in an appropriate manner.

2. MATERIAL HANDLING AND STORAGE

- Ensuring materials and equipment are stored on site in a manner that does not cause injury or illness.
- Indicating where materials are to be delivered and stored (signs may be erected if appropriate), taking into account where materials are used and the order in which they are used.
- Not permitting smoking where flammable materials are stored.
- Ensure the manufacturer's requirements regarding handling and storage of materials are followed.

3. PERSONAL PROTECTIVE EQUIPMENT (PPE)

- Ensuring PPE is used in accordance with the relevant codes of practice for the type or kind of work being engaged in, or in accordance with best-practice standards where no relevant code of practice exists.
- Providing and ensuring the use of items of personal protective equipment where it is not practicable (reasonable) to control risk of injury by other means.
- Ensuring helmets are worn when there is a risk of injury to the head, for example when working underneath other trades.
- Ensuring appropriate protective footwear is used.
- Ensuring that where hazards are created by particular activities, risks are controlled by ensuring the use of PPE, or by some other means.

4. HAZARDOUS SUBSTANCES/CHEMICALS

- Ensuring when using chemicals, the manufacturer's requirements are followed.
- Ensure all hazardous substances on site are correctly stored, labelled and have material safety data sheets (MSDS's). MSDS's should be provided by the supplier or manufacturer at purchase as well as on the purchaser's request.
- All hazardous substances are to be handled in compliance with Chapter 7 of the Work Health and Safety Regulation 2011 and any other relevant document.

5. GUARDING ON TOOLS AND EQUIPMENT

• Ensuring guards are fitted and working effectively before tools and equipment are used.

6. ELECTRICAL

- Ensuring portable electrical equipment is of an industrial standard.
- Ensuring residual current devices are used with all electrical equipment.
- Ensuring power leads are located to minimise the risk of damage and are kept out of puddles, and plugs are kept drv.
- Ensuring extra protection for, or relocation of power leads occurs in areas of high traffic.
- Ensuring portable electrical equipment and power leads are maintained in a safe working condition.
- Ensuring double adaptors, 3-pin adaptors (piggy back), and lightly constructed domestic type appliances are not used for work purposes.

Electrical contractors please note:

- Ensuring electrical installation is completed in accordance with AS/NZS 3000:2007 (SAA Wiring Rules), and are
 tested and connected in accordance with recognised procedures, using suitable testing equipment.
- Ensuring all incomplete circuits are suitably terminated or isolated. Where there is likelihood of those circuits being
 inadvertently energised, they are tagged.

7. MANUAL HANDLING

- Encouraging and using good manual handling techniques. For example:-
 - When bending or fitting try to vary duties or change posture;
 - When bending to lift objects try to maintain an inclined back and bent knees to a semi-squat where your feet are stable on the ground and you assume a power lifter stance;
 - When lifting awkward and heavy items, use mechanical aids
- Where this is not possible consider team lifting where people are trained.
- Ensuring the principles detailed in the National Standard for Manual Tasks are followed as well as those set out in Hazardous Manual Tasks Code of Practice 2011.

8. WORKING ABOVE 2 METRES

• Where work is being conducted at a height greater than 2 metres from the surrounding ground level, then a contractor must comply with *Managing the Risk of Falls at Workplaces Code of Practice 2011*, in relation to controlling the risk of falls.

9. WORKING PLATFORMS ON TRESTLE LADDERS AND ADJUSTABLE TRESTLES

- Platforms (eg. scaffolding planks) on trestles provide a bigger, more stable surface to work from then a ladder rung.
- Ensuring trestles are erected in accordance with suppliers' instructions, and good practice, as outlined in AS/NZS 1892.1-1996 and AS/NZS 1892.2-1996 for trestle ladders, and AS/NZS 1576.5-1995 for adjustable trestles.
- Ensuring platforms are erected as near as reasonable to level, and are stepped rather than sloped, for example when working on gables.
- Ensuring platforms are in good and sound condition.
- Ensuring attention is given to placing trestles on a firm surface.

10. WORKING PLATFORMS ON SCAFFOLDS

- Ensuring scaffolds are satisfactorily erected and used. In particular, ensuring the scaffolds comply with relevant parts of the *Work Health and Safety Regulation 2011*, AS/NZS 1576-2010, and the *Formwork Code of Practice 2006*.
- Ensuring the scaffold is erected in accordance with supplier's instructions, is as near as reasonable to level, and is
 fully decked when being used.

11. LADDERS

- Ensuring ladders are of an industrial standard and comply with and are used in accordance with the requirements of the Work Health and Safety Regulation 2011 and AS/NZS 1892.5-2000 Portable ladders.
- Ensuring attention is given to tying off ladders to the structure, where there is a likelihood of the latter becoming unstable.
- Ensuring attention is given to base stability, particularly on soft or uneven soils.
- Ensuring domestic type ladders are not used and ladders are in a sound working condition. For example, the slip resistant feet are fitted and maintained, rungs and stiles in good condition.

12. MAINTENANCE AND USE OF EQUIPMENT

 Ensuring equipment is adequately maintained and used in accordance with the manufacturer's instructions (for example, power tools).

13. LIGHTING

 Providing adequate temporary lighting if work is to be undertaken in areas where there is insufficient light to work safely.

14. ULTRA VIOLET LIGHT

Encouraging employees to wear adequate clothing, or other protection to protect them from the effects of working
in the sun.

15. WARNING SIGNS

- Warning signs may be required for some hazardous situations. Hazardous situations may include the use of power tools and where there is a risk of being struck by falling objects.
- Ensuring warning signs are clearly visible to any persons who are approaching the area in which the hazardous situation exists.

16. LICENCES

• Ensuring appropriate licences and certificates of competency are held where required in the performance of any work (for example an explosive powered tool certificate).

17. FIRST AID

Ensuring the provision of first aid, which is adequate for the types of injuries which may occur while performing
work, in accordance with Section 42 of the Work Health and Safety Regulation 2011.

18. PROTRUSIONS

 Protrusions include protruding nails; tie-down bolts; reinforcing rods and mesh; bars; steel, copper and plastic tubing; metal flashings; post tensioning cables etc. Ensuring any protrusions created, are removed, bent over or guarded to eliminate or reduce risk of injury, where
they are a hazard.

19. HEALTH AND SAFETY INDUCTION

 Ensuring that employees who are unfamiliar with health and safety issues receive instructions on safe work procedures (JSAs) and practices.

20. OTHER PERSONS

Ensuring that my/our work does not create health & safety risks for the other workers and the public.

21. TRAINING AND SKILL

 Ensuring that my/our employees are sufficiently trained and skilled to perform the work in a healthy and safe manner.

22. FIRE CONTROL

Ensuring a fire extinguisher is supplied where flammable paints and/or liquids are used or stored.

23. STABILITY OF STRUCTURE DURING CONSTRUCTION

- De-stabilisation may be caused by: weather, wind, subsidence, construction loads, live loads, and the premature removal of temporary bracing or temporary propping.
- Ensuring any structure being built remains stable during the construction process.

24. TRENCHING AND EXCAVATION

- Ensuring that our work is supervised by a person who is competent and capable of assessing the risks associated with trenching work. This person should be knowledgeable on trenching, soil stability, appropriate shoring systems, and where possible should have experience of local soil conditions.
- Ensuring that trenches, which people have to enter, are shored where the soil is unstable or prone to collapse.
- Ensuring that trenches deeper than 1.5 metres, which people have to enter, are shored, unless a soil engineer confirms that the trench walls are stable without shoring.
- Ensuring that unattended excavations I/We have created are barricaded or covered where they present a hazard, and are filled as soon as practicable.
- Ensuring that where they present a hazard, unattended excavations are barricaded.
- Ensuring that the Work Health and Safety Regulation 2011 and the Advisory Standard for Excavation are adhered to.

25. PLANT, CRANES AND MACHINES

• Ensuring the safety instructions of drivers or licensed operators of plant are followed.
